

INFORMATION LETTER

IL 206-12-102

IL 206L-12-93

11 June 2012

TO: All owners and operators of 206A/B and 206L Series Bell Helicopters

SUBJECT: INTRODUCTION OF THE 206A/B/L SERIES COMPONENT REPAIR AND OVERHAUL MANUAL

To enhance and provide our customers with more consistent and streamlined overhaul procedures for the entire 206 fleet, Bell Helicopter Textron is introducing the initial release of the BHT-206A/B/L-SERIES-CR&O. This new overhaul manual supports all 206A, B, B3 (TH-67), L, L1, L3, and L4 helicopters.

Although the initial release of the overhaul manual is a partial release providing General Information per Chapter 1, and Mast Assembly overhaul procedures per Chapter 63, regular updates to the manual will be provided until such time that all applicable component overhaul procedures are included. This method of release allows us to provide initial content at this time, as well as updated sections of the manual as soon as they become available, instead of waiting for the entire contents of the manual to be completed.

Until such time that the BHT-206A/B/L-SERIES-CR&O manual incorporates all applicable component overhaul procedures, the BHT-206A/B-M&O manual, BHT-206B3-CR&O manual and the BHT-206L-CR&O manual will continue to be used as applicable for the specific helicopter model and component.

Following incorporation of all applicable component overhaul procedures into the BHT-206A/B/L-SERIES-CR&O manual, the BHT-206A/B-M&O manual, BHT-206B3-CR&O manual and BHT-206L-CR&O manual will be canceled. Bell Helicopter will provide a separate notification when these manuals are canceled.
